Dear Simone and the Cycle of Life team,

R.E Thank you for supporting the Hluhluwe-iMfolozi Park Dehorning Project

On behalf of African Wildlife Vets, I would like to extend our sincere gratitude for your incredibly generous donation of R150,000. Your meaningful contribution is directly assisting us in the purchase of horn pods for the Hluhluwe-iMfolozi Park (HiP) Dehorning Project, which is scheduled to take place in August 2026.

By enabling the acquisition of these horn pods, your support will directly strengthen rhino protection efforts within Hluhluwe-iMfolozi Park. The pods provide a practical, non-invasive tracking solution that can be deployed during routine dehorning operations, building on existing conservation practices. Their use will expand rhino tracking coverage, improve real-time monitoring, and enhance early threat detection, allowing rangers and park managers to respond more effectively. In addition, the data collected will support ongoing scientific research and contribute to more informed, evidence-based conservation management over time.

We are deeply appreciative of your commitment to conservation and your partnership in this important initiative. We will be sure to keep you updated on the progress of the project and share insights from the field as the work unfolds.

Thank you once again for your generosity and trust in our mission.

Warm regards,

Kate Church
